

Citrix® MetaFrame® Secure Access Manager: Administration

CTX-1301AI

Course Description

Course Length:

- Two days

Prerequisite:

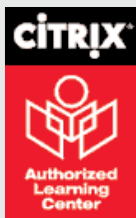

- Recommended experience in the following:
 - Systems/network administration in Microsoft® Windows® 2000 environments
 - Administration of Microsoft Windows 2000 Server or Advanced Server
 - Administration of Citrix MetaFrame XP™ for Windows

Instructional Method:

- Interactive presentation and practical application through hands-on labs and group activities

Certification Preparation:

- This course is an elective towards attaining a Citrix Certified Enterprise Administrator certification (CCEA)

Course Description

If your organization turns to you to deliver secure, personalized access to anything or anyone in your enterprise...from anywhere, this course was designed for you. This course offers hands-on instruction in the installation of Citrix® MetaFrame Secure Access Manager, the configuration and management of MetaFrame Secure Access Manager, and the installation and configuration of Secure Gateway. IT professionals, such as Network, System and Web Administrators will learn how to rapidly and efficiently configure MetaFrame Secure Access Manager by creating and designing roles and pages, and adding users and securing access through Secure Gateway.

With the Citrix Secure Access Manager, Citrix is extending access beyond applications to internal and external data, documents, Web content and services in a workplace that is tailored to each user's needs. With Citrix training, you can stay on the leading edge of this important technology.
