

# Citrix® MetaFrame® XP: Securing and Deploying Applications over the Web

CTX-1227AI

## Course Description

### Course Length:

- One day

### Prerequisite:

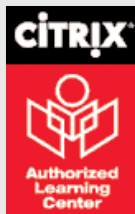

- Recommended experience in the following:
  - Systems and network administration in Microsoft Windows 2000 environment
  - Administration of Citrix MetaFrame XP Presentation Server for Windows (previous attendance at CTX-1211 or CTX-1222 recommended)
  - Administration of application deployment and user authentication across multiple farms recommended
  - Knowledge of IIS or Apache server

### Instructional Method:

- Interactive presentation and practical application through hands-on labs and group activities

### Certification Preparation:

- This course prepares you for the Citrix MetaFrame XP: Securing and Deploying Applications over the Web exam, Citrix Exam #962. Exam # 962 is an exam in the Citrix Certified Enterprise Administrator (CCEA) certification

## Course Description

Citrix® MetaFrame XP™ Presentation Server lets you deploy traditional client/server applications over the Web-without costly conversions. Deploy and manage applications on the Web from a single point with enterprise-class scalability.

Citrix MetaFrame XP Presentation Server delivers high-level security through its SSL-based secure gateway and TLS encryption technologies, and helps you ensure the availability of published applications by specifying failover Citrix MetaFrame XP Presentation Servers for authenticating users. This course, intended for system administrators, provides instruction in the deployment of applications using the web interface and secure gateway features of the Citrix MetaFrame Presentation Server.
